

Dazr Compliance · Factsheet · Implementation and support

Up and running in *days*, not months.

Most teams start on their own: sign in, pick a framework and follow the setup guide. On Enterprise a named implementation specialist helps you bring in existing registers and plan the first cycle, and a yearly business review keeps the programme on track.

Prepare for Audit

A live checklist of what an auditor asks for, computed from your workspace. Fill in any missing facts inline. Each item maps to a real-world question on a real-world audit.

AUDIT-READINESS

75%

54 pass · 25 partial · 10 fail (of 89)

NEXT AUDIT DATE

18/11/2026

DAYS UNTIL AUDIT

47

18 Nov 2026

Less than 2 months. Clear the "Not in control" list and plan a dry run.

Key capabilities

- ✓ **Self-serve start:** sign in with Google, Microsoft or an email code; no implementation project needed to begin.
- ✓ **Bring your data:** import registers from Excel or CSV with column mapping on Enterprise.
- ✓ **Custom:** a dedicated customer success manager, custom SLA and data residency, on request.
- ✓ **In the portal:** a setup guide, a guided tour per role and a help centre with articles in three languages.
- ✓ **Enterprise:** a named implementation specialist, priority support and a yearly business review.

Plans: Free €0 · Basic €29 · Pro €99 · Enterprise €499 per month, excl. VAT · Custom on request

Getting started on your own

1. Sign in at compliance.dazr.eu with Google, Microsoft or a one-time code sent to your work email. No card needed.
2. Pick the framework you care about most; its controls arrive with descriptions, recommendations and review cadences.
3. Follow the setup guide on the dashboard, invite colleagues and assign owners to the first controls.
4. Add the next framework when you are ready; nothing needs rebuilding.

A guided tour introduces each screen for owners, admins, members and auditors, and the help centre in the portal explains every register, in English, Dutch, Italian, German, French, Spanish and Polish.

Implementation on Enterprise

Enterprise includes a **named implementation specialist**: one person who knows your workspace and helps you plan the rollout.

- Scope the frameworks and the Statement of Applicability, and agree who owns which controls.
- Bring in existing vendor, asset and incident registers from Excel or CSV with column mapping and a preview.
- Set up members and roles, auditor access, the breach-report portal, webhooks and the API.
- Use Prepare for Audit to see readiness per framework before the auditor arrives.

Once a year, a **business review** looks back at coverage, incidents and audit findings and plans the year ahead.

Support per plan

Plan	Support
Free	Help centre, guided tours and the setup guide in the portal
Basic and Pro	Email support, plus everything in Free
Enterprise	Priority support, a named implementation specialist and a yearly business review
Custom	A dedicated customer success manager; custom SLA and data residency on request

Write to support@dazr.eu or use the contact form in the portal's help centre.

Custom dashboards and integrations

On the Custom tier, the Dazr team builds and maintains dashboards and reports around your own KPIs, connections to systems such as ticketing, HR or BI, and your own framework templates. Scope and price are agreed per request. On Enterprise you can also build your own on the read-only REST API and HMAC-signed webhooks.

Platform

- | | | |
|--|--|---|
| ✓ Hosted in the EU, built by Dazr in Italy | ✓ Records encrypted at rest with AES-256-GCM | ✓ Sign in with Google, Microsoft or an email code |
| ✓ Roles: owner, admin, member, auditor | ✓ Searchable, exportable activity log | ✓ English, Dutch, Italian, German, French, Spanish and Polish |
