

Dazr Compliance · Factsheet · Security

Security your *reviewers* can check.

What your security and procurement teams will ask about Dazr Compliance, answered in one place: where the data lives, how it is encrypted, how people sign in, who can see what, and the contracts that cover it.

Key capabilities

- ✓ **EU hosting:** application data and backups are stored in the EU. Built by Dazr in Italy.
- ✓ **Sign-in** with Google, Microsoft or a one-time email code; sign out everywhere.
- ✓ **Activity log** of every state-changing action, including Dazr support.
- ✓ **Encryption:** workspace records encrypted at rest with AES-256-GCM at the application layer; HTTPS only.
- ✓ **Roles:** owner, admin, member and time-limited auditor.
- ✓ **Contracts:** a Data Processing Agreement and a published sub-processor list.

Where your data lives

All application data and backups are stored in the EU, under EU jurisdiction. Dazr is an Italian company (VAT IT 02801250065). The portal has no analytics pixels or third-party trackers.

Encryption

Workspace records (controls, risks, incidents, intake reports, the activity log, member and profile data and the other registers) are encrypted at rest with AES-256-GCM at the application layer, on top of the hosting provider's own at-rest encryption. Uploaded files such as evidence and attachments rely on the storage provider's at-rest encryption, sit under unguessable URLs and are only served through an authenticated download; they are not additionally encrypted by the application. Transport is HTTPS only.

Sign-in and sessions

- Sign in with Google, Microsoft or a one-time code sent to your work email, on every plan. Dazr stores no passwords.
- Every request is checked against current membership and scoped to your workspace, so a removed member loses access at once.
- "Sign out everywhere" revokes all sessions of an account.
- Sign-in, public reporting and API endpoints are rate-limited.
- External auditors verify with a one-time code per visit and get access for 1 to 60 days, revocable at any time.

Roles and access

Role	Can
Owner	Everything, including billing, ownership transfer and deleting the workspace
Admin	Manage frameworks, registers, members, auditors and settings
Member	Work on assigned controls and incidents, read the registers, acknowledge policies
Auditor	Read-only access for a set period, comments on controls and notes on incidents

An activity log you can search

Who did what and when, for every state-changing action, including actions taken by Dazr support; when support steps into a workspace, the workspace gets an email. Search it, filter it by type and date, and export it. It keeps the most recent 2,000 events on Free, 5,000 on Basic, 25,000 on Pro and 50,000 on Enterprise.

Contracts and data rights

- A [Data Processing Agreement](#) covers Dazr as your processor under the GDPR.
- The [sub-processor list](#) is published, with 30 days' notice before a sub-processor is added or changed.
- Export every register as Excel and CSV at any time; the owner can delete the workspace.
- Report a vulnerability to security@dazr.eu.

Platform

- | | | |
|--|--|---|
| ✓ Hosted in the EU, built by Dazr in Italy | ✓ Records encrypted at rest with AES-256-GCM | ✓ Sign in with Google, Microsoft or an email code |
