

Dazr Compliance · Factsheet · Trust page

Answer security questionnaires *once*.

Customers keep sending the same supplier questionnaires. Answer the common questions once, publish them on a trust page with your frameworks and sub-processors, and send one link. Sensitive answers and documents can sit behind an access request you approve. Included in Pro and Enterprise.

The screenshot shows a web interface for a 'Trust Center'. At the top, it says 'Brightwater Health TRUST CENTER' with a language selector set to 'EN' and a refresh icon. Below this, there's a section titled 'TRUST CENTER' with the company name 'Brightwater Health'. A description states: 'How Brightwater Health protects patient and staff data: our frameworks, sub-processors and security measures in one place.' It also notes 'Last updated 2 October 2026'. There are three buttons: 'Download PDF', 'Download XLSX', and 'Security contact: security@brightwater.example'. Below this is a section 'Frameworks in scope' with the subtitle 'Standards and regulations we manage our security programme against.' It contains four boxes, each representing a framework: 'ISO/IEC 27001:2022', 'GDPR / AVG', 'NIS2', and 'NEN 7510:2017'. Each box has a status indicator 'Implementing'.

Key capabilities

- ✓ **59 standard questions** in twelve groups, from governance and certifications to logging.
- ✓ **Visibility per answer:** public, gated or internal.
- ✓ **Your page:** your name and logo, frameworks in scope, chosen sub-processors, a PDF download.
- ✓ **Suggested answers** drawn from your workspace, for you to confirm or edit.
- ✓ **Gated access** on Enterprise: visitors request access, you approve, deny or revoke.

The questions customers ask

The trust page covers 59 questions in twelve groups that supplier questionnaires keep returning to: governance, certifications, access control, cryptography, continuity, incident response, vulnerability management, secure development, suppliers, data protection, people and logging.

Dazr suggests answers from what is already in your workspace, such as frameworks, completed controls, incidents and vendors. You confirm the suggestions in one go or write your own answer, and attach evidence where it helps.

Public, gated or internal

- **Public** answers are on the page for anyone with the link.
- **Gated** answers and documents (Enterprise) are shown after a visitor verifies their email and you approve the request. Access can be revoked at any time.
- **Internal** answers stay in the workspace, ready for the next questionnaire.
- The page shows your name and logo, an introduction, the frameworks in scope and the sub-processors you choose from the vendor register; it can be kept out of search engines.

Requests and views

See how often the page is viewed, who requested gated access and when they viewed it. Every change to an answer, every request and every approval is recorded in the activity log. Visitors can download the page as a PDF to attach to their own supplier file.

Platform
